Work on cross-platform mobile application using React Native and Supabase for backend. Notifications.

PROJECTS

DevSync | Demo | GitHub

DevSync is a collaborative platform designed for developers to connect and collaborate on projects.

- It features user profiles, project listings, teams, developers ranking and a real-time chat system.
- Its full stack project all built with Next.js, Tailwind CSS, Supabase DB and framer motion.
- A real time developers collab platform where you can join or create projects and complete tasks.

Games Space | Demo | GitHub

A game platform which is a clone of popular RAWG website and also powered by Rawg api. Where you can search and view from a ton of games.

- Search Functionality, Sort Games, Game Details, Dynamic Routing and Shimmer Loading Effect.

Plantly (Mobile App) | Demo | GitHub

A full-stack cross-platform mobile app built with react-native and expo

- Developed a full-featured Threads clone with real-time post updates using Convex as database.
- Integrated Clerk for secure user authentication and session management.
- Designed a sleek UI replicating the Threads app experience using modern React Native components and smooth animations.
- Implemented features like posting, commenting, and dynamic feed updates.

Camera (Mobile App) Demo App | GitHub

Developed a cross-platform mobile camera application with photo/video capture, filters, and gallery integration. Implemented camera controls, image processing, and local storage using React Native and Expo Camera. Enhanced UX with real-time previews and intuitive editing tools

Note: I have built 20+ full-stack web and 15+ mobile app projects. Please visit my portfolio website for details.

Certificates and Awards

1) **Meta React |** View Certificate
2) **Meta React Native** | View Certificate
3) **Meta JavaScript |** View Certificate
4) **Meta Front-end Development |** View Certificate
